## Subject Index

---

- Acoustic fibers  
  role of acoustic properties in designs of acoustic and optical fibers, 1
- Acoustic lenses  
  acoustic lenses employing PZT thin film transducers, 21
- Acoustic pressure waves  
  efficient generation of acoustic pressure waves by short laser pulses, 37
- Acoustic properties  
  precision ultrasonic velocity measurements for the study of the low temperature acoustic properties in defective materials, 77  
  role of acoustic properties in designs of acoustic and optical fibers, 1
- Alloys  
  enhanced tensile ductility in Fe-Mn-Ni base maraging alloys, 305  
  lattice dynamical mean field criterion for low energy dislocation structure formation in shape memory alloys, 137  
  lithium effects in high temperature deformation of an Al-Li alloy: application to superplasticity, 215  
  microstructure and crystallography of a directionally solidified Ni-NiMo eutectic alloy, 257  
  process control of superplastic forming under superimposed hydrostatic pressure, 193
- Aluminium  
  lithium effects in high temperature deformation of an Al-Li alloy: application to superplasticity, 215  
  observation of stable crack growth in  $\text{Al}_2\text{O}_3$  ceramics using a scanning acoustic microscope, 15  
  process control of superplastic forming under superimposed hydrostatic pressure, 193
- Attenuation  
  study of attenuation and dispersion of optically excited surface acoustic waves employing small poly(vinylidene difluoride) foil transducers, 33
- Base maraging alloys  
  enhanced tensile ductility in Fe-Mn-Ni base maraging alloys, 305
- Bulk waves  
  bulk and surface waves for wood anisotropy characterization, 83
- Carbon  
  mechanical characterization by acoustic techniques of SiC chemical-vapour-deposited thin films, 27  
  scanning electron acoustic microscopy of SiC particles in metals matrix composites, 47
- Ceramics  
  observation of stable crack growth in  $\text{Al}_2\text{O}_3$  ceramics using a scanning acoustic microscope, 15
- Chemical vapour deposition  
  mechanical characterization by acoustic techniques of SiC chemical-vapour-deposited thin films, 27
- Chromium  
  interaction between creep and fatigue in a Cr-Mo-W-V steel, 309
- Cobalt  
  strain hardening and substructural evolution in Ni-Co solid solutions at large strains, 153
- Composite  
  waves and vibrations in periodic piezoelectric composite materials, 65
- Composites  
  influence of some parameters on the strength and fracture toughness of reaction-bonded silicon nitride composites, 173  
  propagation of elastic waves in one-dimensional composites, 71  
  scanning electron acoustic microscopy of SiC particles in metals matrix composites, 47  
  simple development of the shear lag theory appropriate for composites with a relatively small modulus mismatch, 183
- Concentration waves  
  thermally induced concentration wave imaging, 101
- Cork  
  Poisson effect in cork, 227
- Crack growth  
  observation of stable crack growth in  $\text{Al}_2\text{O}_3$  ceramics using a scanning acoustic microscope, 15
- Creep  
  creep substructure formation in sodium chloride single crystals in the power law and exponential creep regimes, 233  
  interaction between creep and fatigue in a Cr-Mo-W-V steel, 309
- Crystallography  
  microstructure and crystallography of a directionally solidified Ni-NiMo eutectic alloy, 257
- Defects  
  precision ultrasonic velocity measurements for the study of the low temperature acoustic properties in defective materials, 77
- Deformation  
  lithium effects in high temperature deformation of an Al-Li alloy: application to superplasticity, 215
- Dislocations  
  temperature rise at a dislocation pile-up breakthrough, 301
- Dispersion  
  study of attenuation and dispersion of optically excited surface acoustic waves employing small poly(vinylidene difluoride) foil transducers, 33
- Ductile metals  
  approximate calculation of fracture ductility and fracture toughness of ductile metals, 205

**Ductility**

enhanced tensile ductility in Fe-Mn-Ni base maraging alloys, 305

**Elastic waves**

propagation of elastic waves in one-dimensional composites, 71

**Fatigue**

interaction between creep and fatigue in a Cr-Mo-W-V steel, 309

**Fracture**

approximate calculation of fracture ductility and fracture toughness of ductile metals, 205

**Fracture toughness**

approximate calculation of fracture ductility and fracture toughness of ductile metals, 205

influence of some parameters on the strength and fracture toughness of reaction-bonded silicon nitride composites, 173

**Graphite**

application of the photoacoustic technique between room temperature and 1000 K for thermophysical measurement of porous graphite samples, 107

**Interferometers**

heterodyne common path interferometers for surface profilometry and characterization, 121

**Interferometry**

interferometric measurement of thermal expansion, 117

**Iron**

enhanced tensile ductility in Fe-Mn-Ni base maraging alloys, 305

**Lattice dynamics**

lattice dynamical mean field criterion for low energy dislocation structure formation in shape memory alloys, 137

**Lithium**

lithium effects in high temperature deformation of an Al-Li alloy: application to superplasticity, 215

**Low energy dislocation structures**

lattice dynamical mean field criterion for low energy dislocation structure formation in shape memory alloys, 137

**Manganese**

enhanced tensile ductility in Fe-Mn-Ni base maraging alloys, 305

**Mechanical characterization**

mechanical characterization by acoustic techniques of SiC chemical-vapour-deposited thin films, 27

**Metallic glasses**

application of scanning tunneling microscopy for crystallization studies of metallic glasses, 251

**Microstructure**

microstructure and crystallography of a directionally solidified Ni-NiMo eutectic alloys, 257

relationship between the strain-hardening exponent  $n$  and the microstructure of metals, 211

**Modulus mismatch**

simple development of the shear lag theory appropriate for composites with a relatively small modulus mismatch, 183

**Molybdenum**

interaction between creep and fatigue in a Cr-Mo-W-V steel, 309

microstructure and crystallography of a directionally solidified Ni-NiMo eutectic alloy, 257

**Neutron irradiation**

positron annihilation study of radiation damage in neutron-irradiated zirconium and its alloys, 243

**Nickel**

enhanced tensile ductility in Fe-Mn-Ni base maraging alloys, 305

microstructure and crystallography of a directionally solidified Ni-NiMo eutectic alloy, 257

strain hardening and substructural evolution in Ni-Co solid solutions at large strains, 153

**Optical fibers**

role of acoustic properties in designs of acoustic and optical fibers, 1

**Oxygen**

observation of stable crack growth in  $Al_2O_3$  ceramics using a scanning acoustic microscope, 15

**Phase transitions**

photoacoustic characterization of liquid crystal phase transitions, 87

**Photoacoustic characterization**

photoacoustic characterization of liquid crystal phase transitions, 87

**Photoacoustic technique**

application of the photoacoustic technique between room temperature and 1000 K for thermophysical measurement of porous graphite samples, 107

**Piezoelectric materials**

waves and vibrations in periodic piezoelectric composite materials, 65

**Plasma surface modifications**

analysis of plasma surface modifications by thermal depth profiling and correlation with plasma-surface interactions, 93

**Poisson effect**

Poisson effect in cork, 227

**Poly(vinylidene difluoride)**

study of attenuation and dispersion of optically excited surface acoustic waves employing small poly(vinylidene difluoride) foil transducers, 33

**Positron annihilation**

positron annihilation study of radiation damage in neutron-irradiated zirconium and its alloys, 243

**Power loss mechanisms**

quantitative analyses of power loss mechanisms in semiconductor devices by thermal wave calorimetry, 127

**PZT**

acoustic lenses employing PZT thin film transducers, 21

**Radiation damage**

positron annihilation study of radiation damage in neutron-irradiated zirconium and its alloys, 243

- Scanning acoustic microprobe analysis  
 scanning acoustic microprobe analysis for testing solid state materials, 9
- Scanning acoustic microscopy  
 observation of stable crack growth in  $\text{Al}_2\text{O}_3$  ceramics using a scanning acoustic microscope, 15
- Scanning electron acoustic microscopy  
 scanning electron acoustic microscopy of SiC particles in metals matrix composites, 47  
 signal generation in scanning electron acoustic microscopy, 57  
 use of scanning electron acoustic microscopy of the analysis of III-V compounds devices, 53
- Scanning tunneling microscopy  
 application of scanning tunneling microscopy for crystallization studies of metallic glasses, 251
- Semiconductors  
 quantitative analyses of power loss mechanisms in semiconductor devices by thermal wave calorimetry, 127
- Shape memory alloys  
 lattice dynamical mean field criterion for low energy dislocation structure formation in shape memory alloys, 137
- Shear lag theory  
 simple development of the shear lag theory appropriate for composites with a relatively small modulus mismatch, 183
- Silicon  
 mechanical characterization by acoustic techniques of SiC chemical-vapour-deposited thin films, 27  
 scanning electron acoustic microscopy of SiC particles in metals matrix composites, 47
- Silicon nitride  
 influence of some parameters on the strength and fracture toughness of reaction-bonded silicon nitride composites, 173
- Single crystals  
 creep substructure formation in sodium chloride single crystals in the power law and exponential creep regimes, 233
- Sodium chloride  
 creep substructure formation in sodium chloride single crystals in the power law and exponential creep regimes, 233
- Solid solutions  
 strain hardening and substructural evolution in Ni-Co solid solutions at large strains, 153
- Steels  
 interaction between creep and fatigue in a Cr-Mo-W-V steel, 309
- Strain hardening  
 relationship between the strain-hardening exponent  $n$  and the microstructure of metals, 211  
 strain hardening and substructural evolution in Ni-Co solid solutions at large strains, 153
- Substructure  
 creep substructure formation in sodium chloride single crystals in the power law and exponential creep regimes, 233
- Superplastic forming  
 process control of superplastic forming under superimposed hydrostatic pressure, 193
- Superplasticity  
 lithium effects in high temperature deformation of an Al-Li alloy: application of superplasticity, 215
- Surface acoustic waves  
 phase-preserving imaging of high frequency surface acoustic wave fields, 43  
 study of attenuation and dispersion of optically excited surface acoustic waves employing small poly(vinylidene difluoride) foil transducers, 33
- Surface profilometry  
 heterodyne common path interferometers for surface profilometry and characterization, 121
- Surface waves  
 bulk and surface waves for wood anisotropy characterization, 83
- Thermal depth profiling  
 analysis of plasma surface modifications by thermal depth profiling and correlation with plasma-surface interactions, 93
- Thermal expansion  
 interferometric measurement of thermal expansion, 117
- Thermal wave calorimetry  
 quantitative analyses of power loss mechanisms in semiconductor devices by thermal wave calorimetry, 127
- Thermal wave detector  
 pyroelectric thermal wave detector and its application, 113
- Thin films  
 acoustic lenses employing PZT thin film transducers, 21  
 mechanical characterization by acoustic techniques of SiC chemical-vapour-deposited thin films, 27
- Transducers  
 acoustic lenses employing PZT thin film transducers, 21  
 study of attenuation and dispersion of optically excited surface acoustic waves employing small poly(vinylidene difluoride) foil transducers, 33
- Tungsten  
 interaction between creep and fatigue in a Cr-Mo-W-V steel, 309
- Wood anisotropy  
 bulk and surface waves for wood anisotropy characterization, 83
- Zirconium  
 positron annihilation study of radiation damage in neutron-irradiated zirconium and its alloys, 243
